

CLEAN COPY OF CLAIM 21

21. A catheter comprising:
- a. a first tube having a proximal end and a distal end;
 - b. a second tube having a proximal end and a distal end, said first tube residing within and extending along the length of said second tube;
 - c. a jet body near said distal end of said first tube, said jet body including a jet emanator;
 - d. at least one outflow orifice and at least one inflow orifice formed in said second tube adjacent to said distal end thereof; and,
 - e. said jet emanator located proximal to said at least one outflow orifice and at least one inflow orifice, and having at least one jet orifice directed in a distal direction toward said distal end of said first tube.
